Botanical Name and Family: *Salvia sclarea*, *Lamiaceae* (Mint) family.

CAS: 8016-63-5

Description: 50% CLARY SAGE Essential Oil 50% Maltodextrin/Maltodextrin

Oil Extraction Process: Clary Sage Oil is typically extracted through steam distillation of the flowering tops and leaves of the Clary Sage plant. The steam carries the volatile compounds from the plant material, which are then condensed to obtain the oil.

Characteristics: Clary Sage Oil has a herbaceous, earthy, and slightly sweet aroma. It is a pale yellow to colorless liquid with a thin consistency.

Active Compounds: The main active compounds in Clary Sage Oil include linalyl acetate, linalool, and sclareol. These compounds contribute to its potential therapeutic effects, including its calming and hormone-balancing properties.

Salvia sclarea is a biennial or perennial herb with fuzzy, heart-shaped leaves and tall flower spikes. It is native to the Mediterranean region and is cultivated for its medicinal and aromatic properties.

Traditional Applications: Clary Sage has a long history of use in traditional medicine and natural remedies. It has been used for its potential hormone-balancing properties, as well as for its calming and soothing effects on the mind and body. It has also been used in skincare preparations and for promoting relaxation.

Commercial Applications: Clary Sage Oil is used in various industries, including perfumery, cosmetics, and aromatherapy. It is valued for its unique scent and potential benefits for skin care and relaxation.

Aromatherapy Applications: In aromatherapy, Clary Sage Oil is known for its calming and balancing properties. It is believed to help reduce stress and anxiety, promote relaxation, and support emotional well-being. It is often used in blends for diffusers, massage oils, and bath products.
