*Nutraceutical, Cosmeceutical,
Health and Wellness Applications*

DATA SHEET: FRANKINCENSE OIL POWDER

Botanical Innovations unique FRANKINCENSE ESSENTIAL OIL POWDER contains 50% essential oil with a carrier. This is unique aromatic fine powder versatile product for a variety of nutraceutical, flavouring and cosmeceutal applications.

Botanical Name and Family: *Boswellia sacra*, *Boswellia carterii*, and *Boswellia serrata*, Burseraceae family.

CAS: 8016-36-2

Description: 50% FRANKINCENSE Essential Oil 50% Modified Starch

Oil Extraction Process: Frankincense Oil is obtained through steam distillation of the dried resin or oleo gum resin from the *Boswellia* trees. The steam carries the aromatic compounds from the resin, which are then condensed to obtain the oil.

Characteristics: Frankincense Oil has a warm, woody, and balsamic aroma with hints of citrus and spice. It is a pale yellow or amber-colored liquid with a medium consistency.

Active Compounds: The main active compounds in frankincense oil include alpha-pinene, limonene, and other monoterpenes. These compounds contribute to its potential therapeutic properties.

Boswellia trees are small to medium-sized deciduous trees with papery bark, sparse foliage, and clustered leaves. They are native to the arid regions of Africa, India, and the Middle East. The resin is extracted from the bark of these trees.

Traditional Applications: Frankincense has a rich history of use in various cultural and religious practices. It has been highly valued for its potential therapeutic properties and used for centuries in traditional medicine. Frankincense has been used to support respiratory health, promote relaxation, and aid in meditation and spiritual rituals.

Commercial Applications: Frankincense Oil is widely used in the fragrance industry as a base note in perfumes, colognes, and skincare products. It is also used in the production of incense, candles, and aromatherapy products.

Aromatherapy Applications: In aromatherapy, Frankincense Oil is known for its grounding and calming effects. It is believed to promote a sense of inner peace, relieve stress and anxiety, and enhance spiritual connection. It is often used in blends for diffusers, massage oils, and inhalation.
