DATA SHEET: GERANIUM OIL POWDER

Botanical's Breath unique GERANIUM ESSENTIAL OIL POWDER contains 50% essential oil with a carrier. This is unique aromatic fine powder versatile product for a variety of nutraceutical, flavouring and cosmeceutal applications

Botanical Name and Family: *Pelargonium graveolens* and *Pelargonium odoratissimum*, Geraniaceae family.

CAS: 8000-46-2

Description: 50% GERANIUM Essential Oil 50% Modified Starch

Oil Extraction Process: Geranium Oil is typically obtained through steam distillation of the leaves and stems of *Pelargonium* plants. The steam carries the volatile compounds from the plant material, which are then condensed to obtain the oil.

Characteristics: Geranium Oil has a floral, sweet, and slightly herbal aroma. It is a pale yellow to greenish-yellow liquid with a thin consistency.

Active Compounds: The main active compounds in Geranium Oil include citronellol, geraniol, linalool, and other terpenes. These compounds contribute to its potential therapeutic properties. *Pelargonium* plants are perennial shrubs with fragrant leaves and colorful flowers. They are native to South Africa but are now cultivated in various regions around the world for their aromatic and ornamental properties.

Traditional Applications: Geranium Oil has a long history of use in traditional medicine and perfumery. It has been valued for its potential anti-inflammatory, antimicrobial, and balancing properties. Geranium Oil has been used to support skin health, alleviate menstrual discomfort, promote emotional well-being, and repel insects.

Commercial Applications: Geranium Oil Powder is widely used in the fragrance and cosmetic industry. It is a popular ingredient in perfumes, soaps, lotions, and other personal care products. It is also used in aromatherapy blends and natural remedies.

Aromatherapy Applications: Geranium Oil Powder is known for its balancing and uplifting effects. It is often used in aromatherapy to promote relaxation, relieve stress and anxiety, and enhance mood. It can be diffused, inhaled, or used in massage blends.
