*Nutraceutical, Cosmeceutical,
Health and Wellness Applications*

DATA SHEET: HYSSOP OIL POWDER

Botanical Innovations unique HYSSOP ESSENTIAL OIL POWDER contains 50% essential oil with a carrier. This is unique aromatic fine powder versatile product for a variety of nutraceutical, flavouring and cosmeceutal applications

Botanical Name and Family: *Hyssopus officinalis*, Lamiaceae (mint) family..

CAS: 8006-83-5

Description: 50% HYSSOP Essential Oil 50% Modified Starch

Oil Extraction Process: Hyssop Oil is typically obtained through steam distillation of the aerial parts of the *Hyssopus officinalis* plant, including the leaves and flowers. Steam distillation involves the use of steam to extract the essential oil from the plant material, which is then condensed and collected.

Characteristics: Hyssop Oil has a strong, herbaceous, and slightly sweet aroma with camphoraceous undertones. It is a thin, clear to pale yellow oil.

Active Compounds: The main active compounds in Hyssop Oil include pinocamphone, isopinocamphone, and various monoterpenes such as pinene, camphene, and limonene. These compounds contribute to its potential therapeutic properties.

Hyssopus officinalis is a bushy herb that grows up to 60 centimeters in height. It has woody stems, narrow leaves, and clusters of small blue or purple flowers.

Traditional Applications: Hyssop has a long history of use in traditional medicine, particularly in herbal remedies and folk medicine. It has been used to support respiratory health, soothe coughs and congestion, alleviate digestive discomfort, and promote overall well-being.

Commercial Applications: Hyssop Oil is used in aromatherapy, perfumery, and cosmetic products. Its pleasant aroma and potential health benefits make it a popular choice in natural remedies, soaps, and personal care items.

Aromatherapy Applications: Hyssop Oil is valued in aromatherapy for its uplifting and purifying properties. It is often used to promote mental clarity, relieve stress, and support emotional well-being. It can be diffused, inhaled directly, or used in massage blends.
