Botanical Name and Family: *Origanum majorana*, Lamiaceae (mint) family.

CAS: 8015-01-8

Description: 50% MARJORAM Essential Oil 50% Modified Starch

Oil Extraction Process: Marjoram Oil is primarily obtained through steam distillation of the fresh or dried leaves of the marjoram plant. Steam distillation involves the use of steam to extract the essential oil from the plant material, which is then condensed and collected.

Characteristics: Marjoram Oil has a warm, herbaceous, and slightly woody aroma with a hint of sweetness. It is a clear to pale yellow oil with a thin consistency.

Active Compounds: The main active compounds in Marjoram Oil include terpinene, sabinene, linalool, and terpinen-4-ol. These compounds contribute to its potential therapeutic properties, including its soothing and relaxing effects.

Origanum majorana is a perennial herb with small, gray-green leaves and pink or white flowers. It is native to the Mediterranean region and is cultivated in various parts of the world for its culinary and medicinal uses.

Traditional Applications: Marjoram has been used in traditional medicine for its potential calming, antispasmodic, and digestive properties. It has also been used as a culinary herb in various cuisines.

Commercial Applications: Marjoram Oil Powder is used in the food and beverage industry as a flavoring agent. It is also used in the cosmetic and fragrance industry for its pleasant aroma.

Aromatherapy Applications: Marjoram Oil Powder is highly valued in aromatherapy for its calming and comforting properties. It is often used to promote relaxation, relieve stress and anxiety, and improve sleep quality. It can be diffused, inhaled directly, or used in massage blends.
