Botanical Name and Family: *Melissa officinalis*, Lamiaceae (mint) family.

CAS: 8014-71-9

Description: 50% MELISSA Essential Oil 50% Modified Starch

Oil Extraction Process: Melissa Oil is obtained through steam distillation of the fresh or dried leaves and flowering tops of the Melissa plant. Steam distillation involves the use of steam to extract the essential oil from the plant material, which is then condensed and collected.

Characteristics: Melissa Oil has a fresh, lemony, and herbaceous aroma with subtle floral notes. It is a pale yellow to greenish oil with a thin consistency.

Active Compounds: The main active compounds in Melissa Oil include citral, citronellal, geraniol, and rosmarinic acid. These compounds contribute to its potential therapeutic properties, including its calming and uplifting effects.

Melissa officinalis is a perennial herb with lemon-scented leaves and small white or pale pink flowers. It is native to the Mediterranean region and is widely cultivated for its medicinal and aromatic properties.

Traditional Applications: Melissa has a long history of traditional use for various purposes. It has been used to support relaxation, promote sleep, soothe digestive discomfort, and provide relief from nervous tension.

Commercial Applications: Melissa Oil Powder is used in the cosmetic and fragrance industry for its pleasant scent. It is also utilized in natural remedies, herbal preparations, and aromatherapy blends.

Aromatherapy Applications: Melissa Oil Powder is highly valued in aromatherapy for its calming and mood-enhancing properties. It is often used to reduce stress, anxiety, and nervousness.

It can be diffused, inhaled directly, or used in massage blends.
