

BOTANICAL'S BREATH

ESSENTIAL OIL POWDERS

*Nutraceutical, Cosmeceutical,
Health and Wellness Applications*

DATA SHEET: MYRRH OIL POWDER

Botanical Innovations unique MYRRH ESSENTIAL OIL POWDER contains 50% essential oil with a carrier. This is unique aromatic fine powder versatile product for a variety of nutraceutical, flavouring and cosmeceutal applications.

Botanical Name and Family: *Commiphora myrrha*, Burseraceae family.

CAS No: 8016-37-3

Description: 50% MYRRH Essential Oil 50% Modified Starch

Oil Extraction Process: Myrrh Oil is obtained through steam distillation or solvent extraction of the resinous sap from the *Commiphora myrrha* tree. Steam distillation involves the use of steam to extract the essential oil from the resin, which is then condensed and collected. Solvent extraction involves using a solvent to dissolve the oil from the resin, which is then evaporated to leave behind the essential oil.

Characteristics: Myrrh Oil has a rich, balsamic, and slightly sweet aroma with warm, resinous undertones. It is a viscous, amber-colored oil.

Active Compounds: The main active compounds in Myrrh Oil include sesquiterpenes, such as curzerene, furanodiene, and lindestrene. These compounds contribute to its potential therapeutic properties, including its soothing and rejuvenating effects.

Commiphora myrrha is a small, thorny tree or shrub that grows in arid regions of Africa and the Middle East. It has knotted branches, small leaves, and produces resinous sap that is harvested for its aromatic properties.

Traditional Applications: Myrrh has a long history of traditional use in various cultures. It has been used for its potential healing and purifying properties, as well as for its aromatic qualities in incense and perfumes.

Commercial Applications: Myrrh Oil is used in the cosmetic and fragrance industry for its aromatic qualities. It is also utilized in natural remedies, traditional medicine, and spiritual practices.

Aromatherapy Applications: Myrrh Oil is highly valued in aromatherapy for its grounding and meditative properties. It is often used to promote a sense of calm, enhance spirituality, and support emotional balance. It can be diffused, inhaled directly, or used in massage blends.
