Botanical Name and Family: *Myristica fragrans*, Myristicaceae family.

CAS No: 8008-45-5

Description: 50% NUTMEG Essential Oil 50% Modified Starch

Oil Extraction Process: Nutmeg Oil is obtained through steam distillation of the dried seeds of the nutmeg fruit. The seeds are crushed and subjected to steam distillation, which separates the volatile compounds and collects the essential oil.

Characteristics: Nutmeg Oil Powder has a warm, spicy, and aromatic fragrance, with hints of sweetness and woody undertones. .

Active Compounds: The main active compounds in Nutmeg Oil include myristicin, elemicin, eugenol, and safrole. These compounds contribute to its potential therapeutic properties, such as its stimulating, analgesic, and antiseptic effects.

Myristica fragrans is an evergreen tree that can reach a height of up to 20 meters. It has dense foliage, dark green leaves, and small yellow flowers. The tree produces fruit, known as nutmeg, which contains the seeds used to extract the essential oil.

Traditional Uses: Nutmeg has a long history of traditional use as a spice and medicinal herb. It has been used for culinary purposes, as well as in traditional medicine practices for its potential digestive, analgesic, and stimulating properties.

Commercial Uses: Nutmeg Oil Powder is used in the food industry as a flavoring agent in culinary applications. It is also utilized in perfumery, soap making, and natural remedies.

Aromatherapy Uses: Nutmeg Oil Powder is valued in aromatherapy for its stimulating and uplifting properties. It is often used to promote mental clarity, relieve fatigue, and create a warm and cozy atmosphere.
