*Nutraceutical, Cosmeceutical,
Health and Wellness Applications*

DATA SHEET: PALMAROSA OIL POWDER

Botanical's Breath unique PALMAROSA ESSENTIAL OIL POWDER contains 40-50% essential oil with a carrier. This is unique aromatic fine powder versatile product for a variety of nutraceutical, flavouring and cosmeceutal applications.

Botanical Name and Family: Cymbopogon martinii, Poaceae (grass) family.

CAS No: 8014-9-5

Description: 40-50% PALMAROSA Essential Oil 50-60 % Maltose, Maltodextrin

Oil Extraction Process: Palmarosa Oil is obtained through steam distillation of the fresh or dried grass of the Palmarosa plant. The oil is extracted from the plant's leaves and stems.

Characteristics: Palmarosa Oil has a sweet, floral, and rosy aroma. It is pale yellow to light green in color and has a thin consistency.

Active Compounds: The main constituents of Palmarosa Oil include geraniol, geranyl acetate, linalool, and other terpenes. These compounds contribute to its pleasant scent and potential therapeutic effects.

The Palmarosa plant is a perennial grass native to India and other tropical regions of Asia. It grows in clumps and has long, slender leaves with a fragrance similar to rose. The plant can reach a height of about 2 meters.

Traditional Application: Palmarosa has been used in traditional Ayurvedic and Indian medicine for its therapeutic properties. It has been used to treat various skin conditions, such as dryness, inflammation, and infections. Additionally, it has been used to help relieve stress, anxiety, and promote relaxation.

Commercial Applications: Palmarosa Oil Powder is commonly used in the perfume and fragrance industry to add a rosy note to various products. It is also used as an ingredient in soaps, cosmetics, and skincare products due to its moisturizing and skin-nourishing properties.

Aromatherapy Applications: Palmarosa Oil Powder is valued in aromatherapy for its calming and uplifting effects. It is often used to relieve stress, anxiety, and promote emotional balance. It is also believed to have antiviral and antibacterial properties and can be used in diffusers or topical applications for respiratory support and immune system enhancement.
