

# BOTANICAL'S BREATH

## ESSENTIAL OIL POWDERS

*Nutraceutical, Cosmeceutical,  
Health and Wellness Applications*

### DATA SHEET: SAGE OIL POWDER

Botanical Innovations unique SAGE ESSENTIAL OIL POWDER contains 50% essential oil with a carrier. This is unique aromatic fine powder versatile product for a variety of nutraceutical, flavouring and cosmeceutal applications.

**Botanical Name and Family:** *Salvia officinalis*, Lamiaceae (mint) family.

**CAS No:** 8022-56-8

**Description:** 50% SAGE Essential Oil 50% Modified Starch

**Extraction Process:** Sage Oil is primarily extracted through steam distillation of the leaves and flowering tops of the *Salvia officinalis* plant. The distillation process captures the essential oil from these plant parts.

**Characteristics:** Sage Oil Powder has a strong, herbaceous, and woody aroma with a hint of camphor. The scent is often described as invigorating, uplifting, and purifying.

**Active Compounds:** The main active compounds in Sage Oil include thujone, camphor, cineole, and various other terpenes. These compounds contribute to the oil's characteristic aroma and its potential therapeutic properties.

*Salvia officinalis* is a perennial herb with woody stems, grayish-green leaves, and purple or blue flowers. It typically grows up to 60 centimeters in height and is native to the Mediterranean region. Sage is known for its aromatic properties and has been cultivated for culinary, medicinal, and ornamental purposes.

**Traditional Uses:** Sage has a long history of traditional use in various cultures. It has been used in traditional medicine for its potential antibacterial, antifungal, and anti-inflammatory properties. Sage leaves have been used in culinary applications as a flavoring agent in dishes and beverages. In folklore, sage has been associated with wisdom, purification, and protection.

**Commercial Uses:** Sage Oil Powder finds applications in various industries. It is used as a flavoring agent in the food and beverage industry, particularly in savory dishes, stuffings, and herbal teas. Sage Oil Powder is also utilized in the production of soaps, detergents, and cosmetics due to its potential antimicrobial properties. Additionally, it can be found in natural perfumes and aromatherapy products.

**Aromatherapy Uses:** In aromatherapy, Sage Oil Powder is known for its clarifying and grounding properties. It is believed to promote mental clarity, improve concentration, and provide a sense of balance. Sage Oil Powder is often used in diffusers, inhalation, or massage blends to create a soothing atmosphere and support mental well-being.
