*Nutraceutical, Cosmeceutical,
Health and Wellness Applications*

DATA SHEET: SANDALWOOD OIL POWDER

Botanical Innovations unique SANDALWOOD ESSENTIAL OIL POWDER contains 50% essential oil with a carrier. This is unique aromatic fine powder versatile product for a variety of nutraceutical, flavouring and cosmeceutal applications.

Botanical Name and Family: Santalum album, Santalaceae family.

CAS No: 8006-87-9

Description: 1-50% SANDALWOOD Essential Oil 50% Modified Starch

Extraction Process: Sandalwood Oil is primarily extracted through steam distillation of the heartwood of the Santalum album tree. The distillation process captures the essential oil from the wood.

Characteristics: Sandalwood Oil Powder has a sweet, woody, and rich aroma with a lingering undertone. The oil's scent is often described as warm, creamy, and exotic.

Active Compounds: The main active compound in Sandalwood Oil is santalol, particularly alpha-santalol and beta-santalol. These compounds contribute to the oil's characteristic aroma and its potential therapeutic properties.

Santalum album is a small to medium-sized evergreen tree native to India, Indonesia, and other parts of Southeast Asia. It has a brown-gray bark and elliptical leaves. The heartwood of the tree is highly valued for its aromatic properties and is used in the production of Sandalwood Oil.

Traditional Uses: Sandalwood has a rich history of use in traditional medicine, religious rituals, and perfumery. It has been valued for its calming and grounding effects. Sandalwood paste has been used in Ayurvedic and traditional Chinese medicine for various purposes, including promoting mental clarity, aiding meditation, and soothing skin irritations.

Commercial Uses: Sandalwood Oil Powder is highly valued in the perfume and cosmetics industries. It is a prized ingredient in luxury perfumes, skincare products, and soaps. Sandalwood Oil is known for its moisturizing, soothing, and anti-inflammatory properties, making it a popular choice for natural skincare formulations. It is also used in the production of candles, incense, and air fresheners.

Aromatherapy Uses: In aromatherapy, Sandalwood Oil Powder is cherished for its calming, grounding, and meditative properties. It is believed to promote relaxation, reduce anxiety, and enhance spiritual well-being. Sandalwood Oil Powder is often used in diffusers, inhalation, or massage blends to create a peaceful and harmonious environment. It is also used in skincare for its potential benefits in improving the complexion, soothing dryness, and supporting overall skin health. The information provided is for educational purposes only.
